about designdot

DesignDot is a fully-grown technology company providing various services in the field of IT and IT enabled services. DesignDot started off as a web design and development company in 2005 and slowly but steadily graduated to a fully grown IT service provider company delivering various value-based, technology-driven and cost-effective solutions to its clients around the globe.

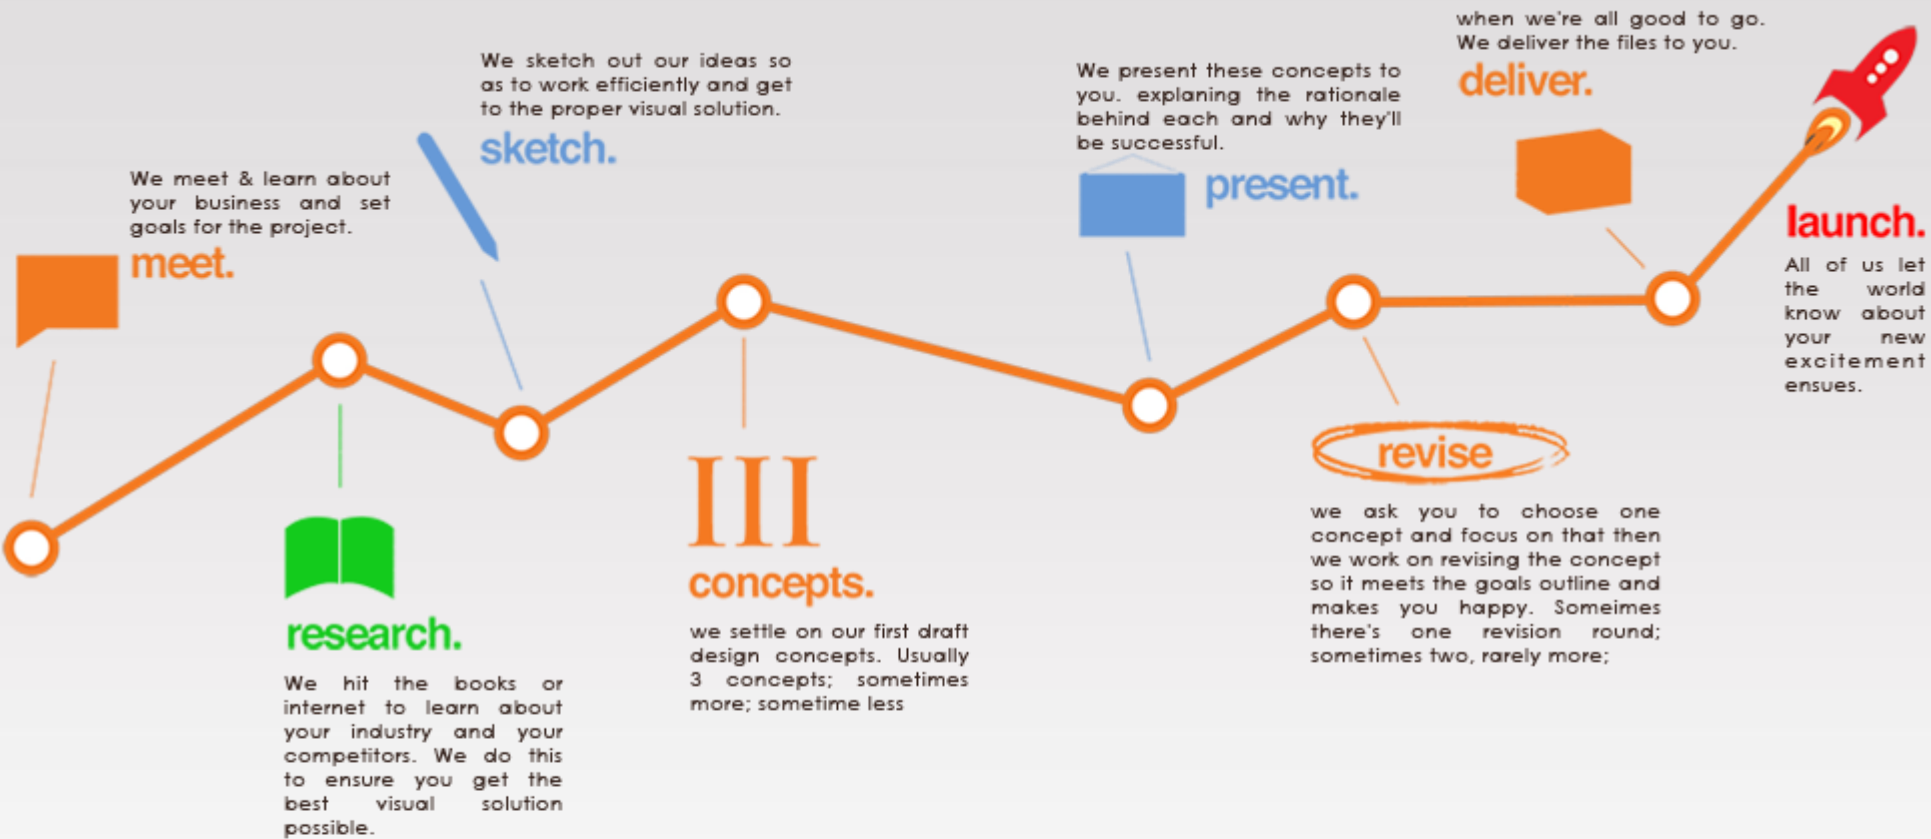

By now, DesignDot has emerged as a one-stop solution provider for many national and international corporate brands. DesignDot has created a niche for itself in the industry and has been accorded with laurels and appreciation for its innovative solutions and optimization techniques. Its core emphasis lies in creating complete cohesion between the various aspects of designing and technology usage.

our vision & mission

DesignDot aims at delivering world class business software solutions to its clients. Constant innovation and advancement is our motto. At DesignDot, we practice latest technological platforms to build cutting-edge ERP, POS and CRM solutions, which help our clients to materialize their goals in cost-efficient manner.

our process

we've worked on our design process to make your project run smoothly, with the best and result possible, this is how we process to complete the project.
